

ABSTRACT OF THE DISCLOSURE

5 A bubble generating assembly has a housing, a bubble solution supply, a bubble
generating frame, and a tubing that couples the bubble solution supply with the
bubble generating frame. The bubble generating frame has two separate portions,
the portions being pivotably coupled to each other in a manner such that the portions
can be pivoted between a closed position where the front surface of the portions
contact each other, and an opened position where the portions are positioned in the
10 same plane to form the bubble generating frame.
